

```
class LoggingMixin:
    def log(self, message):
        print(f"Log: {message}")

class DatabaseMixin:
    def save_to_database(self, data):
        print(f"Saving to database: {data}")

class UserClass(LoggingMixin, DatabaseMixin):
    pass

# Example usage:
user_instance = UserClass()
user_instance.log("User created")
user_instance.save_to_database({"user_id": 1, "name": "John"})
```

```
Log: User created
Saving to database: {'user_id': 1, 'name': 'John'}
```
